

KOMODO 6-IN-1

ELECTRONIC MULTIPURPOSE
HYGIENE CHAIR

The Komodo Multipurpose Hygiene Chair combines 6 products into 1 with our unique electronic movement system

Komodo 6-in-1

Designed to improve safety and dignity when carrying out sensitive hygiene tasks. The Komodo Chair makes single-handed care easy with its lightweight construction and smooth, stable electronic movement system. Reducing the care burden and improving the quality of life for caregiver and end-user.

Wash/Dry Toilet

■ GEBERIT COMPATIBLE

...All I can say is thank you for a fantastic chair, it has made the lives of our carers and the members of our community easier."

Mr Stephen Burton,
Manager at Alde House Care Home

6-IN-1 ASSISTED LIVING CHAIR

By combining six products into one chair the Komodo Multipurpose Hygiene Chair saves space at-home or in the care facility while reducing the number of transfers required for showering and hygiene routines

ONE-TO-ONE CARE

The Electronic Movement system makes it easy for a single caregiver to carry out a full hygiene routine. The chair ensures a safe posture is maintained by the caregiver and improves one-to-one interactions

ADJUSTABLE SUPPORT SETTINGS

Adjustable footrests and a headrest provide support for feet and the head while reclining in the shower function, and when mobile. The footrests can also be fitted with leg straps for extra support.

CONTROLLED VIA WIRED HANDSET

The handset has pre-programmable buttons to achieve standard repeatable positioning for an individual user.

FLEXIBLE PRICING AND BESPOKE OPTIONS

The Komodo Multipurpose Hygiene Chair is available with a range of features as standard, with a lithium-ion rechargeable battery, emergency stop, quality castor wheels and lightweight aluminium construction that fits through all standard door frames. A range of accessories and bespoke sizing options are available. Rental financing is available on request.

Unique Electronic Movement System Improves the Quality of Care

Electronic Variable Height and Toileting

Electronically operated height adjustable settings allow for easy cleaning and easy placement over existing toilet facilities. The variable height caters to individuals hygiene and lifestyle requirements. Enables easy use with a range of Commode Pan inserts and Peristeen cleaning when combined with electronic recline.

Electronic Tilt in Space Showering

The Komodo Hygiene Chair reclines backwards to -37 degrees, allowing the carer to wash and rinse the end-user in a position that is comfortable and secure for both parties. When combined with variable height, cleaning is easy and dignified.

Electronic Stand assist function

The Komodo Hygiene Chair assists the user, capable of weight bearing, in standing, with slow movements that help re-engage the correct leg muscles, whilst ensuring the carer does not take the full weight of the patient.

Standard Features

Alongside the novel movement system, the Komodo Chair incorporates many useful features

Charger input	29.4VDC/500mA

Measurements

Testimonials

"This equipment is absolutely fantastic, we are finding that the members of our community are a lot more comfortable in the Komodo than the chair that goes with the care bath. There is more room and some of our larger residents find the chair an easier fit for them...All I can say is thank you for a fantastic chair, it has made the lives of our carers and the members of our community easier."

Mr Stephen Burton,
Manager at Alde House Care Home

"Summary; Overall the Komodo has fitted into our desire to deliver high quality care to our residents, and to provide a reduction in muscular skeletal demands on our carers, and as time progresses, we feel sure we will develop new caring adaptations & techniques to enable us to benefit from this new technology."

Mrs Diane Delicate,
Manager at Ashlyns Care Home

"Best suited to a nursing home environment and could be an ideal multi-functional piece of equipment to care for an individual in the home setting especially where space is an issue. All participants accepted that this would benefit carer's in their daily role. All participants agreed the device was easy to use and to propel."
